EDUCATION

- **RNCP certifications — Web Developer & IT Project Manager (levels BAC+2 and BAC+5)**
2020 - 2022
IPI/M2i - Ecole O'Clock
- **Master's in Political Science (Journalism)**
2014-2016
IFP (Université Paris II Assas)
- **BA in Applied Modern Languages (LEA) — English, German, Russian**
2010-2013
Université de Nantes / University of Toronto

SOFT SKILLS

Fast to integrate in new environments, strong **communication** skills, and a proactive approach — with a focus on **team collaboration**, technical documentation, and **mentoring** junior developers.

LANGUAGES

- French (Native)
- English (C2)
- German, Russian, Spanish (B1)

VOLUNTEERING

- Croix-Rouge Française : first aid (PSE2), social welfare work

PROFILE

As a full-stack developer at L'Express, I work across the entire stack (**React, Symfony, Node, TypeScript**). I also spent two years on a **Java/Angular** project for Les Mousquetaires, dealing with significant data volume constraints. Technically focused, but with a genuine interest in product and business context, I'm a curious, rigorous, and pragmatic developer. I care about writing clean, maintainable code — but I also know when to ship. I'm now looking for an environment where I can keep learning, keep growing, and make a real impact.

EXPERIENCE

○ FULLSTACK ENGINEER - L'EXPRESS MAGAZINE

April 2023 - Present

Feature development serving the needs of L'Express journalists, ad operations, marketing, and readers.

- Development and maintenance of **React** components for the editorial website (backed by the **ArcXP** CMS), script loading optimization for performance — site serving around 300,000 daily visits)
- Built and documented a design system using Storybook
- Feature development and APIs for internal services (**PHP, Symfony, TypeScript, Twig, Temporal, Postman**)
- Internal dashboards for component inventory (250+ components) and code quality tracking (errors reduced from 1,165 to under 100 over one year) (**Twig, PHP, JavaScript**)
- Technical scoping, code reviews, technical documentation
- AI exploration with Claude (features, reviews, architecture)

○ FULLSTACK ENGINEER - CGI

February 2021 - March 2023

Building a full ecosystem around product cataloguing for **Les Mousquetaires**.

- Back-end feature development and bug fixes across three algorithmic components (**Java 8**, Maven, **Spring Boot**, Hibernate, Jersey), API development, unit testing (JUnit)
- Maintenance and development of batch jobs
- Performance challenges at scale — database tables of 6M+ rows
- Owned the integration of database changelog management with **Liquibase**
- Front-end features and screens (**Angular 10+**, **TypeScript**)
- Technical documentation

○ JOURNALIST

July 2013 - January 2020

A journalism graduate from the Institut Français de Presse (IFP), I spent 7 years writing about science, society, and technology, including nearly 3 years at BFMTV.com.
